

Centraal Planbureau

Layout presentations CPB

M. Kattenberg based on A. Schmidt
CPB-style file following J. Tijm's template

October 19, 2026
www.cpb.nl | @CPBnl

With a lot of help from Codex

Task

A block

- A list:
  - Bullet 1
  - Bullet 2

Today's agenda

- A list:
  - Bullet 1
  - Bullet 2

Section

A title in the frame

- References can be used using the references.bib file.
  - You can cite Lundberg & Lee (2017) or (Lundberg & Lee 2017)
- We recommend adding the Figures in the Figures folder (you can also add subfolders if needed).
  - Reference by using Figure 1
  - If the figures and tables order change, the numbers are automatically updated.

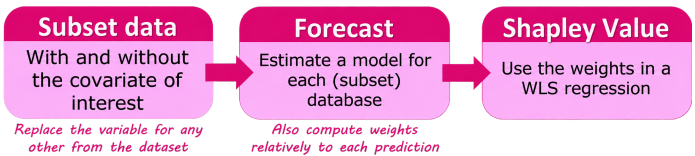

Figure 1: Example of a Figure

Custom LaTeX diagrams

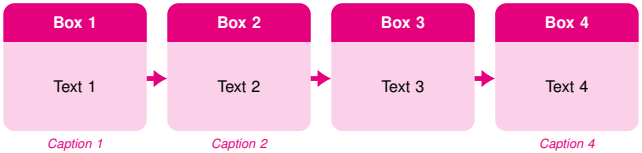

Figure 2: Example of diagram made directly from the template

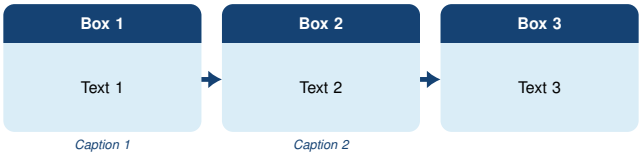

Figure 3: Example of a blue diagram made directly from the template

Slide with table

- You can add tables by creating a new file and adding it to the Tables folder
- You can also make reference to the objects by using Table 1. This can be done with `Table \ref{tab:example_table}`

Table 1: Table example

		In sample		Test	
Horizon	Model	10 vars	15 vars	10 vars	15 vars
1	Elastic net	1.35	1.23	3.81	3.32
	Lasso	1.41	1.27	2.27	2.66
	Random forest	1.00	0.94	2.91	3.27
6	Elastic net	7.24	6.72	7.46	4.49
	Lasso	7.56	5.70	8.77	2.94
	Random forest	2.31	2.14	17.11	17.62

Note: You can also add a footnote to add information about your figure or table.

Split slides into two

you can split a slide in two

- First point
- Second point

Another section

Subtext

- You can have a slide without any decoration by using `\begin{frame}[plain]` when starting your new frame
- You can also have navigation buttons by using `\cpbbutton{appendix:01}{Go to Appendix}{inline}` Go to Appendix
- The position options are `inline, bottom left, bottom right`

What has been done . . .

- An Rmarkdown Beamer template that follows CPB style

What else? . . .

- You can develop this template further as you want

Centraal Planbureau

www.cpb.nl | @CPBnl

Appendix slide

- You can use these Appendix slides to add extra information
- Navigation can be done with buttons that link to other slides
  - For that, you need to add labels to your slides such that the buttons have the right references
